Luxury Redefined
by Vision

At SSVG

we transform natural stone into
enduring beauty-delivered from our
quarries to your doorstep.

30 Years
of Services

Established in

1994

Enduring Quality Since Thirty Year

With over 30 years of industry expertise, SSVG is a vertically integrated group of companies specializing in quarrying, stone processing, and global exports of premium granite and marble.

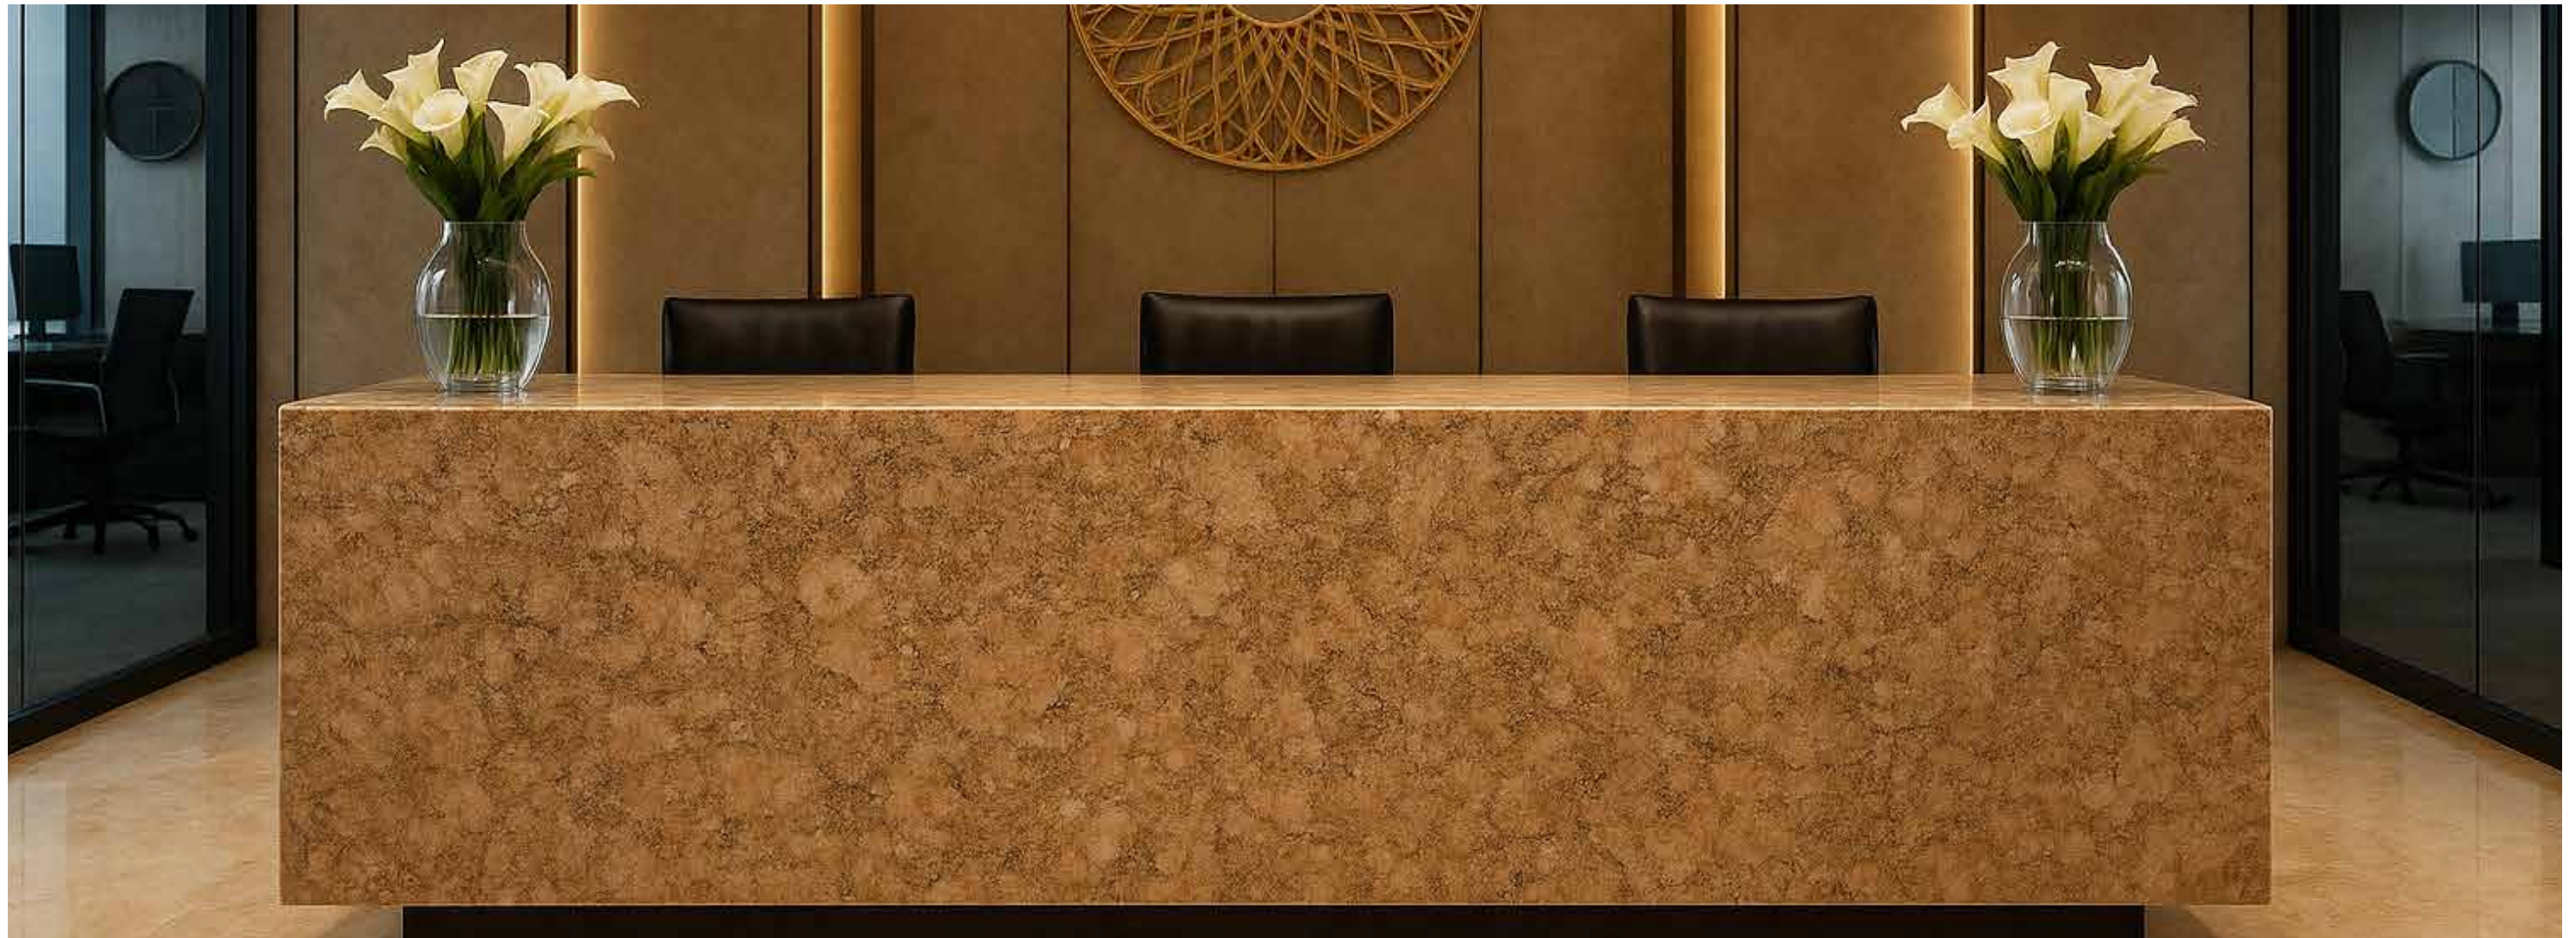

We operate 7 strategically located quarries across Tamil Nadu and Andhra Pradesh, India, ensuring a consistent supply of high-quality raw material. Our processing capabilities are enhanced by 3 contract manufacturing facilities across these states, enabling us to meet stringent customer specifications with precision.

SSVG's monthly quarry output exceeds 2,000 cubic meters, while our processing capacity exceeds 20,000

square meters of slabs. Supported by regional offices in South and West India, we provide comprehensive solutions from raw block extraction to the final delivery of polished slabs catering to both domestic and international markets.

Our strength lies in offering rare stone patterns and maintaining rigorous quality standards throughout the value chain.

At SSVG, we transform natural stone into enduring beauty delivered from our quarries to your doorstep.

Our Value Chain

1. Sustainable Quarrying

We implement advanced, automated quarrying techniques to ensure efficient extraction and consistently high-quality raw materials. Each site is supported by experienced mining engineers to maintain best practices and operational excellence.

2. Quality Assurance

A strict quality management system is enforced across all locations, with comprehensive training for personnel

to ensure consistency. We also offer remote quality inspections, allowing clients to verify product standards in real-time.

3. State-of-the-Art Processing

Our natural stone processing is carried out in modern facilities equipped with the latest automated machinery, ensuring products meet international quality benchmarks.

4. Customization & Precision

We provide tailored solutions in stone cutting, polishing, and patterning to meet specific client requirements. GAD drawing approvals streamline the order process and help eliminate export related errors.

5. Export Packing & Capability

Our robust export packing solutions ensure safe and damage-free international shipments. We use

high-quality, seaworthy packaging materials customized for various stone formats. With a strong global logistics network and compliance with international export regulations, we efficiently serve clients across multiple continents.

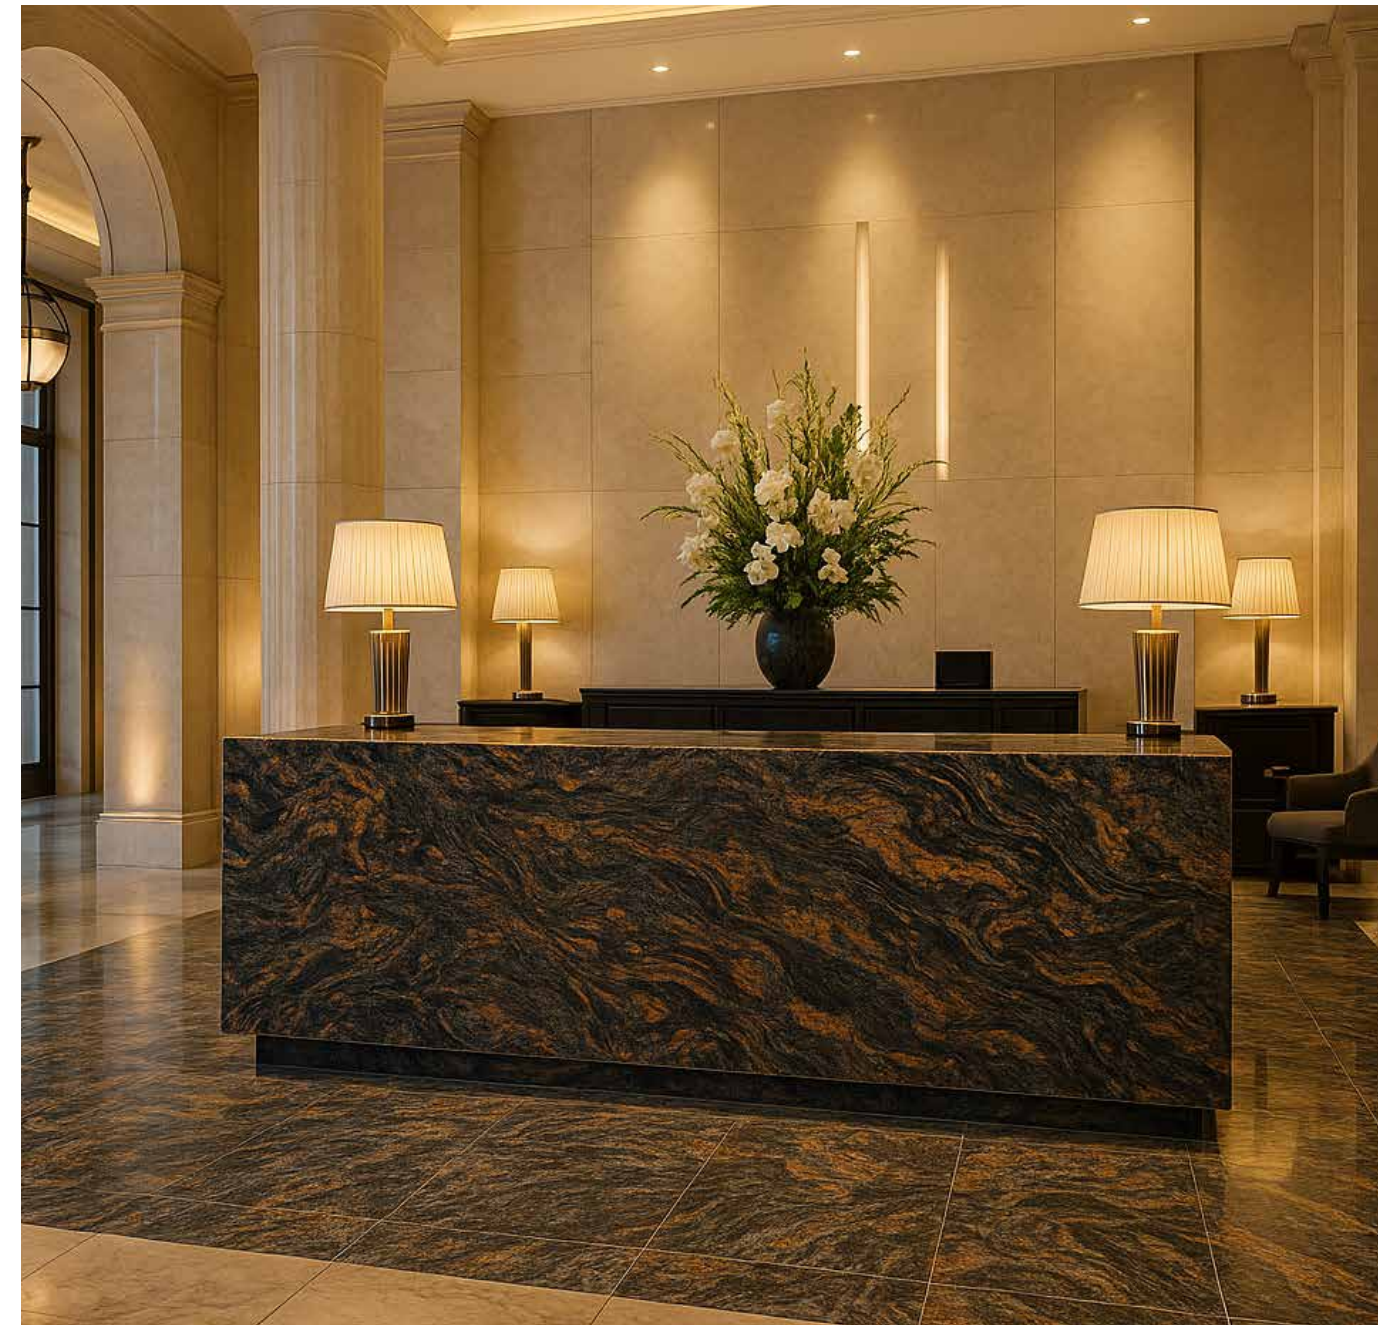

India's Finest Granites
